# How to Use an Interactive Learning Log (ILL)

This is a tool you will use to organize information, makes sense of what you learn, give you a space to personalize your learning, and give you a tool for studying.

The main idea is that you will get things that we'll do together in class and then you will have a chance to make sense of it all. Ultimately, how you make sense of the information we learn about in class determines how well you know the content.
