

FOSSIL story

Processing

Green Rocks (100 mya):

1. Which continents had similar fossils?

2. From the fossil evidence, which continents seem to have been connected 300 million years ago?

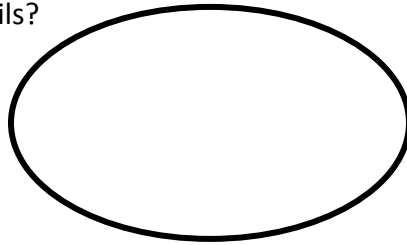

3. Draw a sketch of what you think the continents looked like.

Yellow Rocks (200 mya):

1. Which continents had similar fossils?

2. From the fossil evidence, which continents seem to have been connected 300 million years ago?

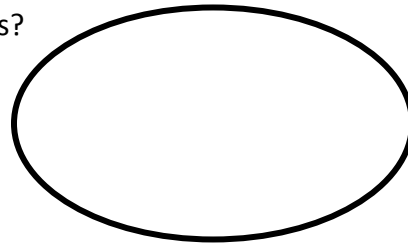

3. Draw a sketch of what you think the continents looked like.

Red Rocks (300 mya):

1. Which continents had similar fossils?

2. From the fossil evidence, which continents seem to have been connected 300 million years ago?

3. Draw a sketch of what you think the continents looked like.

What do you think the **theory of continental drift** means?

What evidence do we have for it?
